ABOUT THE CONFERENCE

The Plant Science and Molecular Biology World Conference PMWC 2024 focuses on advancing innovation and research in the field of plant science and molecular biology. Our main goal of the conference is to explore the latest developments and discoveries as this is a very dynamic field. The conference revolves around the challenges in plant science, providing a platform for scientists, researchers, and practitioners to explore emerging trends and pioneering methodologies. We strive to pave the way for groundbreaking advancements in plant science and molecular biology, ultimately contributing to a deeper understanding of the intricate mechanisms that govern the world of plants and genetics.

Great progress in plant science and molecular biology, including synthetic biology and gene editing using CRISPR-Cas9, are revolutionizing the agriculture sector. This has a global impact by giving the ability to develop resilient and high-yielding crops. In turn, it helps to address the global food security crisis and reduces the environmental impact. It shows great potential for enhancing crop nutrition and sustainability.
